EDUCATION

Master of Science in Data Analytics and Information Systems (MSDAIS) Texas State University, San Marcos, Texas	May 2026
Bachelor of Engineering in Electronics and Communication Engineering (EC) Gujarat Technological University, India Cumulative CGPA (9.07 out of 10-point scale)	Jan 2019

SKILLS

Microsoft Office: Excel (Advanced – Pivot Tables, VLOOKUP, Macros, Data Analysis, Scenario Modeling), Word, PowerPoint.
Data Analysis & Programming: SQL (Advanced), Python (Pandas, NumPy, Scikit-learn), R, Statistical Analysis, Predictive Modeling.
Data Visualization & BI: Tableau, Power BI, Looker, Matplotlib, Seaborn, Dashboard Development, Automated Reporting.
Data Management & Cloud: MySQL, Snowflake, MongoDB, AWS (EC2, S3, Glue, Athena), Databricks, ETL Pipelines, Apache Kafka.
Collaboration & Communication: Cross-functional Project Leadership, Stakeholder Presentations, Written & Verbal Communication, Git/GitHub.

EXPERIENCE

ReArtham Tech LLP India <i>Data Analyst</i>	Oct 2021 - Feb 2022
- Analyzed operational KPIs using SQL, Python, and Excel to identify cost-saving opportunities and performance trends, providing data-driven recommendations that contributed to a 10% reduction in carbon emissions (~500 metric tons CO₂ annually) - Built interactive dashboards in Tableau, Power BI, and Excel to track performance metrics and communicate insights to cross-functional stakeholders, supporting both near-term decisions and longer-term strategy - Automated ETL pipelines for data extraction and reporting, improving processing efficiency by 30% and ensuring data accuracy across all analytical outputs - Presented analytical findings and recommendations to senior stakeholders, translating complex data into clear, actionable insights that influenced business initiatives	
Eco Eclectic Tech India <i>Project Manager - Operations & Data Coordination</i>	Aug 2019 - Sep 2020
- Managed data and budget tracking across seven concurrent projects with 98% accuracy, monitoring expenses and identifying variances to support operational decision-making - Led cross-functional collaboration to streamline project workflows, achieving a 25% reduction in timelines and driving tangible process improvements across the organization - Coordinated resource planning and project timelines with stakeholders at various levels, ensuring alignment between team priorities and broader organizational goals	

FOCUS AREAS & PROJECTS

Real-Time Data Pipeline on AWS Python, SQL, Apache Kafka, AWS (EC2, S3, Glue, Athena)	Feb 2026
- Built end-to-end automated data pipeline using Python and Apache Kafka on AWS to ingest, transform, and store real-time data for downstream analysis and reporting - Designed SQL-based analytical environment via Amazon Athena with automated schema cataloging, enabling scalable querying of large datasets for trend and performance analysis	
Predictive Model for Student Performance Python, Scikit-learn, SQL, Excel	Oct 2024 - Mar 2025
- Developed a predictive model achieving 89% accuracy, performing data cleaning, feature engineering, and statistical analysis to identify key risk factors - Created clear data visualizations and reports to communicate findings to non-technical stakeholders, translating analytical outputs into actionable recommendations
